ALL IN SOLUTION

## **ABOUT APPSTORE**

The REBOTNIX appstore provides ready-to-use applications with high-performance trained AI models. These applications and models are constantly being developed and improved.

## APPLICATIONS

EVERY APPLICATION IS BINED TO THE GUSTAV BOX AND AN HARDWARE CRYPTO CHIP REQUIRES AN LICENSE

NAME	SKU	REQUIRED HARDWARE	PRICING	PERIOD
TTS Engine	RB_TTS_122024	ORIN Nano 8GB or ORIN NX 8GB or 16GB	599,00€	Flatrate per <b>year</b>
STT Engine	RB_SST_122024	ORIN NX 8GB or 16GB	499,00 €	Flatrate per <b>year</b>
HP-Model Human	RB_HP_122024	ORIN Nano 8GB or ORIN NX 8GB or 16GB	499,00 €	Flatrate per <b>year</b>
Smart City	RB_SC_122024	ORIN Nano 8GB or ORIN NX 8GB or 16GB	539,00 €	Flatrate per <b>month</b>
LICENSE PLATE & RECOGNITION	RB_OCR_122024	ORIN NX 8GB or 16GB	499,00 €	Flatrate per year

PRICING FOR ONE BOX INSTALLATION. ALL PRICES ARE IN EUROS. ALL ARE TRAINED FROM SCRATCH AND CAN BE FINE-TUNED USING REBOTNIX'S LOW-ENERGY DATA CENTER.

### **APPLICATION TTS-ENGINE** SKU RB\_TTS\_122024

REBOTNIX text to speech engine is a text to speech engine with focus on the highest accuracy of quality, optimized for NVIDIA JETSON and Metropolis frameworks.

Optimized for low power consumption, expandable with custom voices, the tts engine in combination with the REBOTNIX gustav hardware offers the highest value per price and GPT based output in the market. The engine works offline without any cloud access.

We currently support 12 different languages (Arabic, Brazilian Portuguese, Chinese, Czech, Dutch, English, French, German, Italian, Polish, Spanish Turkish).

## It is possible to fine-tune a model using our application service.

## APPLICATION STT-ENGINE SKU RB\_STT\_122024

The STT engine offers a audio to text transcription and, if desired, a translation into other languages from the transcription.

Supported languages:

English, German, Spanish, Czech, Italian, French, Swedish.

In combination with the downstream translation module, we can translate the text into other languages.

The Translate from STT is a seperate module that can translate the output from the TTS engine into another language.

## APPLICATION HP-HUMAN SKU RB\_HP\_122024

REBOTNIX HP, human people is an AI model that has been trained from the ground up to recognize heads and people for various applications. Among others for an anomalization of person protected content.

The application returns the number of people x and y position of each recognised person. The model is constantly being upgraded to ensure the highest accuracy.

It is possible to fine-tune a model using our application service.

## APPLICATION SMART CITY SKU RB\_SC\_122024

REBOTNIX smart city is one of the most comprehensive models from REBOTNIX. It detects 19 classes from the smart city category such as trees, potholes, traffic signs, motorised vehicles, bicycles and many others. Rebotnix smart city is developed with the in-house vision tools for object detection processes.

#### LICENSE PLATE & RECOGNITION SKU RB\_SC\_122024

REBOTNIX enables the reliable recognition of license plates and the extraction of texts. In doing so, we differentiate between in line and multiple labeling.

It is possible to fine-tune a model using our application service.

# FINE TUNING SERVICE

Each model can be fine-tuned via the rebotnix low energy datacenter in Europe. If you notice that the quality is not good enough, you can improve the model with your own data.

For this purpose, a protected and encrypted training session is set up to a low energy data center, the data is uploaded. you then briefly describe the text and we can present the annotations. First submit the annotations, which you then confirm for training.

All services are fully automated, you do not need to label or annotate the data, we also train the best model and report details about the training process. At the end you can export and download the new own model and execute it on your license GUSTAV hardware.

SERVICE	SKU	AMOUNT OF DATA	PRICING
TTS Engine	FT_RB_TTS_122024	1 HOUR OF AUDIO DATA	299,00 €
STT Engine TRANSLATE STT	FT_RB_STT Engine	1 HOUR OF AUDIO DATA	399,00 € 99.00 €
HP-Model Human	FT_ RB_HP_122024	1000 Annotations	499,00 €
Smart City	FT_RB_SC_122024	1000 Annotations	499,00 €

ANNOTATION, LABELING AND TRAINING INCLUDED.

# APPLICATION VISIONTOOLS

VISIONTOOLS was developed in 2019 for the use of low-power visual computers. It consists of a set of software tools to make working with complex AI models easy. The software modules include a project management, user administration, a visual labeling editor as well as an export for any A.I. model that you create with VISIONTOOLS. Each module works without cloud constraints.

#### Accurate fast

A data-centric apporach to AI ensures quality data even for small datasets.

#### Ultra Easy

An intuitive Cloud or onPremise solution that lets you create a custom computer vision project in minutes.

#### Flexible deployment

Deploy your model with just a few mouse clicks using our cloud or edge inference engine.

#### **Unlimited scalability**

Scaling projects is simple with REBOTNIX VISIONTOOLS, from a single line of production to worldwide operations.
